

Cosimo Zatti

London, UK | (+39) 3881620811 | cosimo.zatti@gmail.com | LinkedIn | GitHub

Profile

Economist and public-policy researcher (LSE MPA in Economic Policy; BSc Economics, Politics and Social Sciences, 110/110 *cum laude*) working at the intersection of economics, political economy and political science. Experienced in cleaning and analysing large datasets in Python, R and Stata and in short-form policy writing, with research interests in the political economy of good jobs, industrial strategy and state capacity.

Education

Dual Master's Degree: London School of Economics & Sciences Po Sep 2025 – Jul 2027 (expected)
Master of Public Administration (Economic Policy) & Master in Public Policy (Global Health Track)

- LSE: ranked top 5 worldwide for Economics; Sciences Po: ranked 2nd worldwide for Politics (QS 2025)
- Representative, Association de l'Ecole d'Affaires Publiques (Sciences Po)
- Coursework: Development Economics, Advanced Empirical Methods for Policy Analysis, Labour Economics, Public Economics, Sustainable Finance and Impact Investing, Global Health Economics.

University of Bologna – BSc in Economics, Politics and Social Sciences Sep 2022 – Jul 2025
Grade: 110/110 Cum Laude (highest distinction awarded) | 191/180 ECTS | GPA: 29/30

- Top-ranked public university in Italy for Economics (QS Subject Rankings 2022)
- Coursework: Econometrics, Micro/Macro/Public/International Economics, Data Science, EU/International Law

Research & Work Experience

FAO Investment Centre (CFI) – Junior Economist Intern Rome | May – Nov 2026
East and Southern Africa Service (CFIA): EU Global Gateway Initiative & EIB-FAO Partnership

- Drafted a CFI investment toolkit on value chain competitiveness analysis along EU Global Gateway territorial corridors in Africa (Lobito, TAZARA & Nacala) published in the K4I.
- Supporting the design of an EIB-funded Technical Assistance programme for the Somali Development and Reconstruction Bank lending to agricultural SMEs and Midcaps, assessing lending practices, environmental and social risk management procedures, and institutional and state capacity to absorb EIB credit lines for sustainable agribusiness investment
- Screening bank loan portfolios against EIB Climate Action and Environmental Sustainability (CAES) and Financing for Gender Equality criteria, identifying qualifying exposures and pipeline opportunities; mapped capacity-building needs for allocation, monitoring, and reporting in line with EIB requirements
- Drafting access-to-finance and gender-inclusion sections of the final Somalia report, recommending specific interventions on smallholder financing, female borrower outreach, and climate-resilient agronomic upgrading

Hospinnomics Chair, Paris School of Economics – Research Intern Paris | Mar – May 2026
ANR RESISTE Project: Financial Incentives for Cervical Cancer Screening

- Conducted a methodological literature review on Discrete Choice Experiments (DCEs) in health preference elicitation, covering Lancaster-Rosen attribute-based utility theory, random utility models (MNL, mixed logit), experimental design efficiency (D-efficiency, orthogonal designs), and sample size determination for DCEs
- Reviewed the Atkinson (1970) social welfare function and approaches to estimating the inequality aversion parameter (ϵ): revealed social preferences from fiscal schedules, calibration from distributional weights in cost-benefit analysis, and direct elicitation via survey and lottery experiments
- Independently assessed large-scale French administrative microdata (ERFS, FiLoSoFi, DADS, INSEE Comptes nationaux) for parametric Atkinson index estimation; drafted technical feasibility memos on data coverage, unit-of-analysis suitability, and variable availability for income distribution modelling
- Contributed to the design of DCE survey instruments, supporting questionnaire development and attribute-level specification

HSBC Continental Europe – Green Finance Challenge Paris | Nov 2025 – Feb 2026

- Co-authored a comprehensive benchmarking report on the EU Climate Tech ecosystem, assessing how European industrial strategy and regulatory frameworks (EU Green Deal, CSRD, Net Zero Industry Act) shape cross-border venture capital mobilisation
- Evaluated major EU financing schemes (InvestEU, Innovation Fund) and analysed the role of European public institutions (EIB, EIF) in using blended finance to de-risk first-of-a-kind (FOAK) industrial projects

European Investment Bank (EIB) – Climate Hackathon Paris | Oct 2025

- Cleaned, harmonised and analysed 2023 EIB Climate Survey microdata (19,067 respondents across 27 EU Member States), producing data visualisations and econometric models in R
- Designed dual econometric strategy: country-level OLS regression and individual-level weighted regression with country fixed effects; presented findings to senior EIB experts and published results as a co-authored analytical report (see Publications)

National Institute for Public Policy Analysis (INAPP) – Research Intern
Rome | Jun – Sep 2024

- Cleaned and analysed large administrative datasets (500+ collective labour agreements) to inform national reform on wage indexation and income protection, central to the political economy of job quality (‘good jobs’)
- Researched inflation indexation mechanisms, IPCA-NEI links, contractual vacation clauses, and one-time wage increases
- Built reproducible analytical workflows; research findings contributed to *Rapporto INAPP 2024*, Italy’s flagship annual publication on labour market policy

Publications

Antunes, Blanquet, Gillesberger, **Zatti**, & Zhou (2025). “Media environment and climate knowledge as drivers of public support for green investment in Europe.” *Analytical Report, EIB Climate Survey Hackathon 2025*. European Investment Bank, co-organised with the European Chair for Sustainable Development and Climate Transition. [Link]

Work in progress:

“Social preferences for solidarity in health: an empirical test of implicit theories of distributive justice in France”, DCE on public preferences over health-care prioritisation, testing competing theories of distributive justice; co-authored, ANR RESISTE project, Paris School of Economics; in preparation for submission to a peer-reviewed journal.

Methodological note on value-chain competitiveness along the EU Global Gateway corridors (Lobito, TAZARA & Nacala), FAO Investment Centre, 2026.

Specialized Training & Certifications

FAO – Investment Project Formulation and Management	2026
Project cycle in IFI-financed agricultural investments: identification, preparation, appraisal, financial and economic analysis, supervision; aligned with FAO-EIB and FAO-World Bank operational practice	
FAO – Partnerships with the European Union: Mastering the Agreement Templates	2026
Data for Public Policy and Social Choices – University of Bologna	May 2025
Applied empirical microeconomics & causal inference methods (DiD, Synthetic Control, ML) to policy impact evaluation	
UN & WHO – Specialized Module on Human Health and Climate Change	Jun 2025
Analysed the impact of climate change on global health; evaluated mitigation and adaptation policies	
Sant’Anna School of Advanced Studies, Pisa – Summer School	Mar 2025
InnovAction in Health Care: Strategy, Performance & Data Management in Health Systems	
H-FARM College, Roncade – Summer School	Jul 2024
EU climate policies, agri-tech, digital business strategies	

Leadership & Volunteering

CISV International (UNESCO-affiliated) – Representative	2017 – 2025
Led 40-member youth team, coordinating programs and campaigns (2021-2022); volunteered for over 7 years	
Policy Forums: EUI State of the Union Delegate (May 2024); OECD World Forum on Well-being	
European Solidarity Corps (Aug–Sep 2023): Infrastructure restoration & digital resilience project, Germany	

Skills

Research Methods:

- Political economy and institutional analysis; comparative public policy
- Systematic literature review, stated-preference methods (DCE, conjoint analysis)
- Stochastic Frontier Analysis, Value chain competitiveness analysis
- Health preference elicitation, social welfare function estimation
- Policy analysis, econometrics, causal inference (DiD, RDD, Synthetic Control, Matching, IV)
- Project cycle management (identification, preparation, appraisal, supervision)
- Environmental and social risk screening

Writing: Briefing notes, short-form analytical reports, literature reviews, feasibility memos

Technical: R (Tidyverse, ggplot2, Quarto), Stata, Python (pandas, Matplotlib), $\text{\LaTeX}$, Excel, Microsoft Office, Slack, Canva; data cleaning, statistical analysis and data visualisation; LLM/AI-assisted analysis (Claude Code)

Languages: Italian (native) | English (IELTS 8.0) | French (C1) | Spanish (B1)
